

# Yonela Sitshaka

Dates: 23 February 2023 to 10 March 2023

**THE CONTENT OF THE INTERNSHIP REPORT IS AS FOLLOWS:**

**D2.1 How did the PXT assessment help you understand your thinking style, behavioral traits, and career interest?**

It gave me the best guideline when it comes to behavior in the office as I never had any work experience.

**D2.2 Skills learned during the internship month.**

I learned how to take a project from 0 to completion in a small amount of time, and how to configure the server to allow your project to be accessible online and work as required by the client. I have also learned how to best interact with the client to produce a product that satisfies the client's needs.

**D2.3 Competency acquired during the internship month.**

I am competent in any skill mentioned in my resume, time and again I have proven to my host employer that I am competent.

**D2.4 Time spent with the supervisor (number of hours per week), advice, and training received:**  
10 and above. Server configuration, interface design, contract drafting, and project pricing.

**D2.5 Innovations by the learner, student, or graduate that delighted the host employer (add proof):**

**The governance project that I delivered in a small amount of time.**

**D2.6 Mistakes and errors committed by the learner:**

I added fields that were not needed so I had to make many changes, which almost frustrated my mentor.

**D2.7 Areas for improvement in the following month:**

I need to understand how to deploy applications, that is, to create applications that match the host platform's requirements before deployment. This is because when you start to deploy you get many errors due to the mismatch of requirements between the project and the host server.

D2.8 Warnings and concerns received by the intern from the supervisor, other employees, or managers in the company: None

**D2.9 How has your thinking style improved during this month and what activities did you do to secure the improvement?**

It has improved a lot that I have learned new skills of planning, which make me more productive. And also ways of working to see results.

D2.10 To what extent did your interaction with your supervisor and other staff members/interns enhanced your weaknesses in relation to the behavioral traits?

At no extant, the relationship between us has been very formal and professional.

**D2.11 Give evidence of how has your internship challenged or confirmed your career interest?**

Below is the link to the federation website that I just created and now I know I have a great chance in the industry.
